

HONUA OLA WATER SYSTEM

Honua Ola will be using only non-drinking water for the cooling water system. The water will be drawn from a salt water source and will be returned to the brackish and salt water depths in the aquifer.

DISCHARGED WATER IS SAFE

Honua Ola will comply with all environmental rules and requirements.

Total amount of additives = $\frac{1 \text{ part}}{5 \text{ million parts water}}$

NO TRAFFIC, WEIGHT OR SAFETY ISSUES

Honua Ola log trucks are no longer than other commercial haulers and will weigh less than the limit rating for roadways and bridges. Based on a traffic study conducted, they will not add noticeably to the overall volume of traffic on the road.
